

Reduce loss exposures and price more effectively through leading indicators

Two realities:

1. Surprises are seldom good for business – yet insight into the “faint signals” that foreshadow them can be
2. Amplifying such signals to quantify risk exposure and thereby protect your existing portfolios or extend their value becomes a non-stop imperative – and opportunity – given the new competitive normal that every business, globally, faces.

That’s where we come in.

We are an AI solutions company with a tight focus to predict, amplify, map and quantify the financial and operational impacts of different types of events on banking economic and operational KPIs, regulatory capital exposures as well as operational and workforce capabilities.

Event Monitoring & Quantification

Health and Productivity Insights

To predict productivity impacts based on the distribution of different types of claims from different parts of a business – including insights across sectors, locations and skill-sets

Event Monitoring

Amplifying & quantifying faint signals of potential impact with implications on economic performance, organizational capabilities, partner networks and workforce / skill-sets

Opportunities for Alpha / More Risk-Informed Returns

3rd Party Risk Management

To ‘make visible’ your full partner network, as well as quantify and map their risk exposures (and consequently yours) in terms of portfolio and operational risk points of view

Forward Looking Credit Risk Exposures

To assess the impact of external events on portfolio risk / default exposures or capital requirements such as climate, COVID, regulatory change, etc.

Unanticipated Implication of Events / Risks Previously Unseen

Predicting COVID Implications on...

C&I portfolios, Sector-by-sector, county-by-county and workforce implications – to predict and adjust portfolio risk exposures
