## CLEARPRISM powered by: CapImpact ...

### Machine intelligence applied to Private Equity.

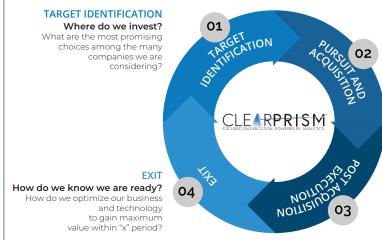

## Accelerating portfolio growth and value realization through data visualization, algorithmic insight and execution focus

While investment and financial professionals identify and model financial assets, ClearPrism identifies and executes around operational capabilities and assets through:

- · Deep consultative experience enabled by simulation, visualization and predictive analytics
- · Algorithmic insights into the few capabilities that drive the majority of economic value
- Stress-testing strategic assumptions regarding where value will be created and destroyed and what to do
  about it

## The power of machine intelligence applied to portfolios.

Harness deep expertise and robust data-driven visualization, simulation and predictive analytics to address the full lifecycle.

#### DUE DILIGENCE How do we acquire? How do we complete due diligence, ensuring business and tech alignment while mitigating execution risks?

#### POST ACQUISITION EXECUTION How can we execute with speed and scale?

How do we transform and optimize investment, and what programs do we invest in and in what order?

# Getting to the right answers based algorigthmic insights.

Insights in days, rather than weeks. Execution planning in weeks, rather than months, and overall program execution in months, rather than years. That's ClearPrism, powered by CapImpact.

### **ClearPrism** The power of predictable performance.
