

We tackle impossible problems, powered by algorithms and data science

20% of assets drive the majority of economic value of any organization. As market conditions and technologies evolve, the ongoing relevance of what made any organization successful – that 20% – changes; there is always a “decay rate” of what has driven economic value to date and what will drive it tomorrow. Re-stated, there will always be a “new 20%” of new capabilities that will drive the majority of new economic value.

Solutions:

Portfolio Optimization & Due Diligence

- Due Diligence
- Portfolio Optimization
- Strategic Scenarios & the New 20%
- Workforce of the Future

Supply Chain & Event Monitoring

- Risk Indices
- Third-Party Risk Exposure & Optimization
- Supply Chain Event Monitoring

Fraud and Financial Crime

- AML
- Payments and Loan Fraud

Population Health & Benefits Optimization

- Health Wellness Program ROI and VOI
- Health Network Cost Leakage / Care Quality Optimization
- Health & Wealth Optimization

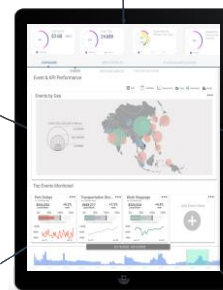

We are a team of 40+ data scientists, PhD quants, business strategists and former senior leaders from global consulting and technology organizations...

including IBM, KPMG, Deloitte, Lucidity, Booz-Allen, Capgemini, the CDC and technology start-ups

What makes us different?

Our ability to adapt, evolve and **systematically deepen taxonomies**, leveraging NLP and machine learning

Rich industry and functional taxonomies – rapidly created, quickly customized

We **amplify “faint signals”** and identify anomalies across events that matter... mapped to the taxonomies and associated KPIs

Our algorithmic mapping *across* taxonomies with quantification of of “impacts on and implications of...” at a hyper-granular level

EVERYTHING tied to financial metrics and operational KPIs, algorithmically

Delivered as

“Insights on Demand” and/or **Hosted Monitoring Services**
