

# Due Diligence

The power of machine intelligence applied to your portfolio companies

Good due diligence keeps you out of bad deals. Great due diligence gets you into deals that deliver Alpha. We help our clients go from Good to Great through algorithmic insights, powered by AI and math.

## Services

While investment and financial professionals identify and model financial assets, we complement that focus assessing business, operational, technology & market-fit through:

1. Simulation, visualization and predictive analytics
2. Algorithmic insights into new sources of value
3. Stress-testing assumptions regarding where value will be created... and destroyed... and what to do about it

## Algorithmic Insights from different perspectives:

### Assessments

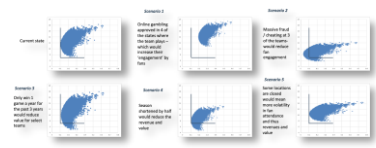

Critical Capabilities / Processes / Technologies

Capital Flow  
What specific capabilities are different types of capital investing in?

Portfolio Returns under different conditions

### Bets

Start-Ups  
Where are the focused?

IP / Research  
What are the "hot topics" of investment? (what's not)

Competitive Spend

### Surprises

Partner Network Risk Exposure

Risk Exposures / Index

Ripple Effects
